EXPERIENCE

SmartBridge (in collaboration with APSICHE & MongoDB)

Full-Stack Developer Intern – MERN Stack

Virtual

May 2026 – Jul 2026

– Online Book Store Application

- Developed a scalable full-stack e-commerce web application with robust transaction and inventory workflows using React, Node.js, Express, and MongoDB.
- Implemented secure multi-tier Role-Based Access Control (RBAC) and authentication using JWT and bcrypt across 3 roles (user, inventory manager, admin).
- Built and validated RESTful APIs for catalog search, dynamic order checkout, and automated inventory tracking.

Infosys Springboard

Full-Stack Web Development Intern

Virtual

Nov 2025 – Jan 2026

– Civic Issue Reporting & Tracking Application

- Architected a full-stack community management and issue tracking system using Node.js, Express, MongoDB, and React.
- Engineered secure RESTful APIs with RBAC access policies for citizen, volunteer, and administrative tiers.
- Integrated interactive Leaflet maps for accurate geotagging and created responsive UI/UX prototypes in Figma.

PROJECTS

EV Charging Slot Booking System (EV Slot) | React.js, Node.js, Express.js, MongoDB, Leaflet

- Developed a full-stack platform enabling users to locate nearby EV charging stations and reserve real-time time slots.
- Engineered a conflict-free scheduling and slot allocation algorithm to manage concurrency and eliminate double-booking.
- Built real-time status dashboards for station operators and integrated interactive map-based location tagging.
